We have witnessed rapid advancements in various artificial intelligence (AI) technologies, and many forms of information and communication systems with AI are becoming integral parts of our daily lives. With the proliferation of future information, communication, and electronic devices, there is growing interest in the integration of AI with information and communication technology (ICT). This conference aims to facilitate the transfer of these technologies into practical applications, developing intelligent ICT systems and exploring AI applications for content, platforms, networks, and devices.

The 7<sup>th</sup> International Conference on AI in Information and Communication (ICAIC 2025) focuses on advances in ICT research, covering topics from core ICT technology to emerging AI applications for ICTs. ICAIC 2025 invites original, unpublished contributions in all aspects of AI in information and communication. Submitted articles must not be under consideration for publication elsewhere. We also encourage submissions of short papers on early-stage research or development in progress, which present significant new challenges. Position papers on new ideas and industry papers are also welcome.

The conference, organized by KICS (The Korean Institute of Communications and Information Sciences) Artificial Intelligence Society and Fukuoka University, with technical co-sponsorship from IEEE Communications Society (IEEE ComSoc), IEICE-CS, and IEICE NOLTA Society, will take place in Fukuoka, Japan & as a Virtual Conference. Accepted and presented papers will be published in the ICAIC Conference Proceedings with an assigned ISBN number and submitted to IEEE Xplore, Scopus, and EI Compendex. Additionally, extended versions of selected papers will be published in the some international journals as a special issue for ICAIC 2025.

### The topics include, but are not limited to
